

Unique stainless steel tubing
with superior strength,
wear resistance and
edge durability.

- ▶ Typically two times stronger than 304 stainless, capable of 260 ksi ultimate tensile strength
- ▶ Superior notch tensile strength and fracture toughness for demanding fatigue applications

XCALIBER

TUBING

- ▶ Corrosion resistance similar to 304 stainless
- ▶ Edge retention far superior to 300 series stainless steel
- ▶ Galling and wear resistance much better than 300 series stainless steel
- ▶ ISO 13485 and ISO 9001:2000 registered

We are a rapid response, customer centric, medical device metal products contract manufacturer. We provide medical-grade alloy tubing, complete in-house build-to-print manufacturing of precision metal tubular components, machined components, and assemblies for the medical industry.
